**EU citizen · Open to relocation and remote work · Available immediately**

## SUMMARY

Junior 3D Generalist focused on hard-surface asset creation and environment work, with broadcast production experience modelling LaLiga's official club crests under a tight deadline. I build clean, optimised assets and procedural environments in Houdini and Maya, and take shots through layout, lighting and rendering. Also experienced in Houdini FX (destruction, smoke/pyro and particles), which helps me deliver complete shots and work closely with FX and lighting teams.

## SELECTED 3D WORK

**LaLiga Broadcast Crest Modelling** — Hard-surface assets
Official football club crests for broadcast use, with a focus on hard-surface forms, clean geometry, bevel control, optimisation and production handoff.

**The Witcher Fan Art** — Procedural environment, Houdini
Large-scale environment with terrain, architectural layout and scene assembly built procedurally (trees were external assets), with attention to scale, composition, modular controls and an organised node structure.

**The Fall into Oblivion** — Cinematic environment, Maya
Post-crash environment focusing on layout, asset placement, lighting, atmosphere, camera framing and final visual presentation.

**Houdini FX Shots** — Smoke Portal Sim · RBD Space Marine Destruction
Smoke simulation with electrical elements and a spaceship reveal, and an RBD destruction shot from intact structure to concrete collapse, both refined through cached simulation iterations.

## EXPERIENCE

**LaLiga** — Freelance 3D Artist **2025**

- Modelled and optimised 10 official team crests in one week for LaLiga's broadcast opening pieces.
- Worked from visual references, technical requirements and production feedback.
- Delivered clean, optimised, export-ready assets for integration into the final broadcast pipeline.

**Skylife Engineering** — Visual Content Intern **2022 – 2023**

- Created instructional simulations for a 3D training simulator, combining 2D elements with 3D assets to explain technical processes.
- Worked to functional requirements, feedback cycles and production constraints.

## EDUCATION

**TRAZOS School of Art** — Madrid **2023 – 2025**
Training in advanced Maya and Houdini workflows.

## SKILLS

**Modelling:** Hard-surface · Asset creation · Asset optimisation · Reference matching

**Look:** Lighting · Rendering · Basic lookdev · Texturing (Substance Painter)

**Tools:** Maya · Houdini · Arnold · Substance Painter · ZBrush · Nuke · 3ds Max · Gaea · Wrap3D

**Environments:** Procedural environments · Layout · Scene assembly · Scene organisation

**FX / Scripting:** RBD · Pyro / smoke · POPs · Vellum · VEX (working knowledge)

**Languages:** Spanish (native) · English (advanced, professional working proficiency) · French (conversational)
