SUMMARY

Junior FX Artist specialising in Houdini destruction, pyro/smoke and particle effects, with broadcast production experience on LaLiga's match openings. I build art-directable, procedural setups with clean, organised networks that are easy to hand off, and iterate through cached simulations to refine timing, scale and readability. Background in modelling, lighting and procedural environments, and currently developing my VEX skills.

SELECTED FX / HOUDINI WORK

Smoke Portal Sim — Houdini FX shot
Sci-fi portal effect combining smoke simulation, electrical elements and a spaceship reveal. Focus on smoke shape control, timing, readability, scale, lighting and cinematic presentation.

RBD Space Marine Destruction — Houdini FX study
Destruction shot from intact structure to concrete collapse: fracture setup, debris motion and impact timing. Iterated through cached simulations to refine destruction behaviour and final shot polish.

The Witcher Fan Art — Procedural environment, Houdini
Large-scale environment with terrain, architectural layout and scene assembly built procedurally (trees were external assets), with modular controls and an organised node structure.

EXPERIENCE

LaLiga — Freelance 3D Artist **2025**

- Modelled 10 official team crests in one week for LaLiga's broadcast opening pieces.
- Worked from visual references, technical requirements and production feedback.
- Delivered clean, consistently named, export-ready assets for handoff into the broadcast pipeline.

Skylife Engineering — Visual Content Intern **2022 – 2023**

- Created instructional simulations for a training simulator, combining 2D elements with 3D assets.
- Worked to functional requirements, feedback cycles and production constraints.

EDUCATION

TRAZOS School of Art — Madrid **2023 – 2025**
Training in advanced Maya and Houdini FX workflows.

SKILLS

FX: RBD / destruction · Pyro / smoke · POPs · Vellum · Procedural setups · Simulation caching

3D / Look: Modelling · Environment building · Lighting · Rendering · Basic lookdev

Tools: Houdini · Maya · Arnold · Nuke · Substance Painter · ZBrush · 3ds Max · Gaea · Wrap3D

Scripting: VEX (working knowledge, actively developing)

Pipeline: USD / Solaris · Scene organisation · Pipeline awareness

Languages: Spanish (native) · English (advanced, professional working proficiency) · French (conversational)
